## TAREA 8 EJERCICIOS DE CADENA

Realice un ejercicio de cada uno de los métodos que a continuación se mencionan.

| Clase         | Método         | Propiedad |
|---------------|----------------|-----------|
| Object        | ToString()     |           |
| Date          | DateTime       | Now       |
| String        |                | Format()  |
|               | Concat()       |           |
|               | Compare()      |           |
|               | Equals()       |           |
|               | Contains()     |           |
|               | Substring()    |           |
|               | EndsWith()     |           |
|               | CopyTo()       |           |
|               | Insert()       |           |
|               | LastIndexOf()  |           |
|               | PadLeft()      |           |
|               | PadRight()     |           |
|               | Remove()       |           |
|               | Replace()      |           |
|               | Split()        |           |
|               | ToLower()      |           |
|               | ToUppert()     |           |
|               | Trim()         |           |
|               | TrimStart()    |           |
|               | TrimEnd()      |           |
| StringBuilder |                | Capacity  |
|               |                | Chart     |
|               |                | Length    |
|               | Append()       |           |
|               | WriteLine()    |           |
|               | AppendFormat() |           |
|               | ToString()     |           |
